

NAME

cnt - index counter

SYNOPSIS

cnt N ..

DESCRIPTION

Cnt counts from 0 to N-1, producing N lines of output. If multiple arguments are given, *cnt* produces a nested array of values where the final counter rotates fastest through its range. *Cnt* is most useful in conjunction with *rcalc(1)* to produce array values.

EXAMPLE

To create a 3 by 5 array:

```
cnt 3 5
```
