

NAME

`pflip` - flip a RADIANCE picture.

SYNOPSIS

`pflip` [**`-h`**] [**`-v`**] [**`-c`**] **input** [**output**]

DESCRIPTION

Pflip flips a RADIANCE picture horizontally and/or vertically. The `-h` option results in a horizontal exchange, and the `-v` option results in a vertical exchange. Both options may be applied.

The `-c` option indicates that the action is to correct an improper original image orientation, thus the recorded scanline ordering should not be changed.
