

NAME

plotin - convert plot(5) to metafile(5) primitives

SYNOPSIS

plotin file ..

DESCRIPTION

Plotin reads each plot(5) *file* in sequence and converts it to output suitable for use by the metafile filters. If no input files are specified, the standard input is read.

EXAMPLE

To plot the graph example.grf to the imagen:

```
graph < example.grf | plotin | impress | ipr
```

FILES

see pexpand(1)
